Mobile Device Management
The core of the digital learning environment is the Mobile Device Management (MDM)

- Establish a seamless learning environment for conducive teaching and learning
- Configure students’ iPad to specific setting and content
- Enable parents to control their children’s iPad after school
Mobile Device Management

- All the iPads have been enrolled under Mobile Device Management
- iPad will change into school interface during school hours starting from 7.30am
- Release the supervision after school
- Deploy necessary learning apps into students’ iPad wirelessly
- Paid apps can be purchased and downloaded to iPad for all FAS students
- Allow seamless network connection for the iPads that are under supervision
Mobile Device Management
Mobile Device Management

- All the iPads enrolled into MDM by default. The timing is from 7.30am to 2.50pm.
- Parents can request to change the timing to 24 hours. Please write in to admiralty_ss@moe.edu.sg and state specify your child’s name and class.
Mobile Device Management
Zuludesk parent portal allows parents to manage their children’s iPads by instilling discipline and restrictions on the device.

The parent portal account is chargeable. The first year is free for parents. Parents will need to co-pay from second year onwards.
1) Visit the website: https://parent.zuludesk.com
2) Enter “Admiralty Secondary School”

3) Key in the Username and password

School created the username and password for all the parents accounts. **The username is the parent’s school email address without admiraltysec.edu.sg**

Password is Adssparents2019
4) Your child’s name is shown together with the iPad details
4) If your child’s device is not installed with MDM, it will show “Device not yet managed”
Mobile Device Management
Parent Portal

5) When you scroll down, you will see your child’s iPad details
